

Message From the Sun

Verse 1	I heard it in the wind It was a message from the sun And it sounded like an angel Crying from above Telling me a story About all the world we see And it cursed the power passion And the poetry of greed
Verse 2	The sun was on my face On that purple mountain side And I wanted to escape From the destruction that we find But that voice it did tell me About the yin and yang profound It was the death of my perception I sat up and looked around
Chorus	It was a message from the sun And something warmed me It was a message from the sun And something told me It said despite adversity To stay full of what's beautiful to me
Post-Chorus	What's beautiful to me I try to see What's beautiful to me What's beautiful?
Verse 3	For every death someone is born For every tear there's laughter's sound For every murder there's a savior For every war peace will abound And anger lives with joy You know that love it walks with hate Destruction and rejuvenation Will be here forever and a day
½ Verse 4	For every cold heart there's compassion For the impossible—there're dreams But now I look to see the beauty In spite of all the misery
Chorus Post-Chorus Bridge	It was a message from the sun... What's beautiful to me... The heaven's earth Is beautiful to me Where love remains That's beautiful to me
Chorus Vamp
